DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-6, 15-20 and 23-28, drawn to an apparatus, classified in class
 subclass 666+.
- II. Claims 7-10, drawn to the method of making a semiconductor device, classified in class 438, subclass 132+.
- III. Claims 11-14, 21-22, drawn to a semiconductor device, classified in class257, subclass 529+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could be used to practice another and materially different process such as one in which the at least one fuse element not to be disconnected is with a corresponding overlying layer of etching barrier resin at the point when the fuse is etched, rather than without a corresponding overlying layer of etching barrier resin.

Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the

Application/Control Number: 10/665,481

Art Unit: 2812

process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device could be made by another and materially different process such as a process in which the at least one fuse element not to be disconnected is with a corresponding overlying layer of etching barrier resin at the point when the fuse is etched (disconnected), rather than without a corresponding overlying layer of etching barrier resin.

Inventions I and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus can be used for making a different product that is not a semiconductor device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Thomas J. D'Amico on April 23, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2812

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer M. Kennedy whose telephone number is (571) 272-1672. The examiner can normally be reached on Mon.-Fri. 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Niebling can be reached on (571) 272-1679. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
